GENETICS

A PERIODICAL RECORD OF INVESTIGATIONS BEARING ON HEREDITY AND VARIATION

Founded in 1916

by

GEORGE H. SHULL

with the cooperation of

WILLIAM E. CASTLE	BRADLEY M. DAVIS	HERBERT S. JENNINGS
EDWIN G. CONKLIN	EDWARD M. EAST	THOMAS H. MORGAN
CHARLES B. DAVENPORT	ROLLINS A. EMERSON	RAYMOND PEARL

VOLUME 39 - 1954

WITH 6 PLATES AND 133 TEXT FIGURES

PUBLISHED BY GENETICS, INC.
GENETICS BLDG., UNIVERSITY OF WISCONSIN
MADISON 6, WISCONSIN
U. S. A.

INDEX

Page numbers of regular articles are given in boldface type

ABRAHAM, S., 955
ABRAHAMSON, S., 955, 998
  X-ray dose and lethal mutations, Drosophila, **741**
Abstracts of papers presented at the 1954 meetings of the Genetics Society of America, 955
acetate requirement, Neurospora, 997
aging, effect of X-rays on, 977
ALEXANDER, MARY L., 956
  mutation rates, mature and immature germ cells, *Drosophila melanogaster*, **409**
alleles, dissimilar, Drosophila, 999
Allium, 994
allopolyploids, *Elymus glaucus* and *Sitanion* spp., **378**
amino acids, intracellular, 968
amphibians, differentiation in mating call, 959
  pigment pattern, 999
ANDERSON, E. G., translocations, chromosome 10, maize, **506**
ANDERSON, V. L., model for quantitative inheritance, **883**
ANNAN, M. E., 957
  antigens, sheep, genic epistasis, **396**
APPLEYARD, R. K., lysogenic types, *Escherichia coli* K12, **429, 440**
ARNASON, T. J., chromosome aberrations, fractional doses of X-rays, Tradescantia, **220**
Aster hybrids, triploids, chromosome behavior in, **117**
attached-X, detachment, 986
ATWOOD, K. C., 957, 987
AVERS, CHARLOTTE J., chromosome behavior, triploid Aster hybrids, **117**

bacteria, population changes, 962
BAKER, W. K., 957
barley, carbon dioxide, oxygen, and temperature related to X-ray effects on, **943**
  effects of X-rays and thermal neutrons on, **240**
  linkage groups in, **159**
BARTON, DONALD W., primary trisomics, tomato, **640**
BEARD, B. H., effects of X-rays and thermal neutrons on barley seeds, **240**
BEATTY, A. V., 958
BEATTY, JEANNE W., 958
BELL, A. E., 958
BENNET, J. H., panmixia with tetrasomic and hexasomic inheritance, **150**
beta-carotene, genetics of, tomato, **810**
BLAIR, W. F., 959
BLIGHT, W. C., 959
blood groups, chickens, 961
  Columbidae, 983, 985
  sheep, **396**

GENETICS 39: 1005 November 1954.

BOOTHROYD, E. R., chromosome numbers in somatic tissues of mouse and man, **210**
BOWDEN, W. M., 959
BOWEN, C. C., 960
BOYES, J. W., 961
BRAUN, W., 962
BRAVER, G., crossing over, inversion, *Drosophila melanogaster*, **197**
  meiotic loss, chromosomes, *Drosophila melanogaster*, **365**
BREWBAKER, JAMES L., competition and self-compatibility, autotetraploid *Trifolium repens*, **307**
BRILES, W. E., 961
BRINK, R. A., very light variegated pericarp, maize, **724**
BRNCIC, DANKO, heterosis and genotypic integration, geographic populations, *Drosophila pseudoobscura*, **77**
BROWMAN, LUDVIG G., microphthalmia and material effect in rat, **261**
Brown, Meta S., 962
  three-species hybrids, Gossypium, **546**
Brucella, 962
BURDICK, A. B., 963
  heterosis, tomato, **488**
BUTLER, L., 963

CAIN, A. J., natural selection, Cepaea, **89**
CALDECOTT, RICHARD S., effects of X-rays and thermal neutrons on barley seeds, **240**
carbon dioxide, relation to X-ray effects, barley, **943**
carcinogenic compounds, mutagenicity of, *Escherichia coli*, **141**
CASPAR, A. L., 993
CASTLE, W. E., coat color inheritance, **35**
Cepaea, natural selection in, **89**
chemical mutagenesis, 992
chemical protection against radiation, **356**
chicken, 961, 976, 980, 988
Chromosome aberrations, fractional doses, X-rays, **220**
  arrangement, Drosophila spermatozoa, **836**
  behavior, triploid Aster hybrids, **117**
  break analysis, 966
  loss, meiosis, *Drosophila melanogaster*, **365**
  numbers, somatic tissue in mouse and man, **210**
CLAYTON, FRANCES E., 956, 964
  measurement and control, X-radiation effects, *Drosophila virilis*, **453**
cleft palate, mice, 975
coat color, inheritance of, **35**
COCKERHAM, C. CLARK, partitioning hereditary variance, **859**
Columbidae, blood groups in, 983, 985

COMSTOCK, R. E., 990
CONKLIN, EDWIN GRANT, biography, **1**
correlated characters, 994
cortisone, teratogenic action of, mouse, **185**
  teratological effects of, 1000
crossing over, 972, 980, 982
  genotypic control of, *Drosophila pseudoobscura*, **677**
  mechanism of, **692**
  somatic, 974
  within an inversion, **197**
cybernetics, 997
cytochrome deficiency, yeast, 989
cytoplasmic and genic interaction, **229**

DANIELS, K. M., genetics of polyploid yeast, **343**
DDT, resistance to, 994
DERMEN, H., 964
diallel cross, theory and analysis of, **789**
  Nicotiana rustica, continuous variation, **767**
Diptera, karotypes in, 961
dissimilar alleles, Drosophila, 999
DOBZHANSKY, THEODOSIUS, concealed variability, *Drosophila prosaltans*, **472**
  spontaneous mutation rates, *Drosophila pseudoobscura*, *D. persimilis*, **899**
DOLLINGER, E. J., induced mutation, maize, X-ray and gamma irradiation, **750**
dormancy in trees, 986, 987
dosage effect, tomato, 995
DOUDNEY, C. O., 965
DRETS, M. E., 1003
Drosophila affinis, 983
  americana, 959
  chromosome loss, ultraviolet, **565**
  compound X chromosomes in, **127**
  melanogaster, 955, 958, 964, 967, 968, 970, 971, 977, 978, 979, 982, 983, 985, 986, 992, 993, 994, 998, 999, 1002
  crossing over within an inversion, **197**
  gene action and position in duplications in, **513**
  genetic drift, irradiated populations of, **529**
  meiotic loss unpaired chromosomes in, **365**
  miniature complex in, **45**
  mutation rates, mature and immature germ cells, **409**
  reversed acrocentric compound X chromosomes, **923**
  parthenogenesis in, **4**
  persimilis, mutation rate, second chromosome, **899**
  prosaltans, concealed variability in, **472**
  pscudoobscura, genotypic control of crossing over in, **677**
  mutation rates, spontaneous, second chromosome, **899**
  heterosis and genotypic integration in geographic populations of, **77**
  robusta, 957, 979
  X-ray-induced dominant lethals in, **558**
spermatozoa, chromosome arrangement in, **836**
  virilis, 956, 957
  measurement ond control, X-radiation effects, **453**
  X-ray dose and lethal mutations in, **741**
DUDGEON, EDNA, measurement and control, X-radiation effects, *Drosophila virilis*, **453**
DUNCAN, R. E., 965
Dzierzon's law, 960

EATON, ORSON N., heterosis, rabbit weight, **667**
egg mortality after radiation, Drosophila, 998
Elymus glaucus, artificial hybrids with *Sitanion* spp., **378**
embryo viability, X-ray effects on, chickens, 988
Escherichia coli, 978, 984
  K12, lambda lysogenicity in, **429**
  K12, new lysogenic types in, **440**
  mutagenicity of carcinogenic compounds for, **141**
  quantitative estimate radiation induced streptomycin resistance in, **296**
eye color development, Drosophila, 992

FABERGÉ, A. C., 966
FARNSWORTH, P. C., 978
FISCHER, G., 980
FISHMAN, MARVIN, mutagenicity of carcinogenic compounds, *Escherichia coli*, **141**
FLING, MARGUERITE, 972
FORRO, F., 966
FORSTHOEFEL, PAULINUS F., 967
FOX, A. S., 967
FRASER, F. C., 1000
fruit color, genetics of, tomato, **810**
FUERST, R., 968
FUNG, S-T. C., 968

GAITHER, NENITA, 977
gamma radiation, effect on maize, 993
  endosperm mutations, maize, **587**
  induced mutation, maize, **750**
GARBER, E. D., 969
GARDNER, C. O., effects of X-rays and thermal neutrons on barley seeds, **240**
genetic drift in irradiated populations of *Drosophila melanogaster*, **529**
genotypic balance, *Drosophila pseudoobscura*, **77**
GERSTEL, D. U., lethal interspecific cotton hybrids, **628**
Golgi bodies, 981
Gossypium hirsutum, 982
  interspecific homologies, genic, **701**, **712**
  lethal interspecific hybrids in, **628**
  species hybrids, **546**, 962
GOWEN, J. W., 968, 969
Gramineae, hybrids and allopolyploids in, **378**
gynandromorphs in wasps, 1001

HAAS, FELIX L., measurement and control, direct and indirect X-radiation effects, *Drosophila virilis*, **453**

Habrobracon, 975
nitrogen mustard effects on sperm of, **317**
oxygen effects, X-ray, eggs of, **851**
HAHN, E., 1002
HANSON, EARL D., kappa-like particles, *Paramecium aurelia* sensitives, **229**
HANSON, W. D., linkage groups with one chromosome, barley, **159**
HARVEY, P. H., 990
HAYMAN, B. I., diallel cross, theory and analysis, **789**
Hemophilus influenzae, transforming principle in, 1002
hereditary variance, partitioning of, **859**
hermaphroditic factor, Drosophila, 968
HERSKOWITZ, I. H., 955, 970, 992
chromosome arrangement, Drosophila spermatozoa, **836**
X-ray dose and lethal mutations, Drosophila, **741**
heterocaryon, 987
heterosis, 963, 971, 990
Drosophila pseudoobscura, **77**
mutants, inbred lines of maize, **908**
rabbits, **667**
tomato, **488**
heterozygosis and growth, related to recombination in phage T2, **169**
hexasomic inheritance, panmixia with, **150**
HEXTER, W. M., 971
HINTON, T., 971
histidine, inhibition by, Neurospora, 988
HOROWITZ, N. H., 972
horses, coat color inheritance in, **35**
HOWE, H. B., JR., 972
HSU, T. C., 973
HUESTIS, R. R., 973
HUNTER, F., 989
hybrid substance, Columbidae, 983, 985
HYDE, B. B., 974

immunogenetics, tyrosinase, **818**
information theory, genetics and, 997
interspecific hybrids, Melilotus, **266**
irradiation, effect on genetic drift, *Drosophila melanogaster*, **529**
IRWIN, M. R., 985
epistasis and antigenic substances, sheep, **396**
isoalleles, 978

JAMES, A. P., 974
JANICK, J., 974, 975
jaundice in mice, 973
JINKS, J. L., continuous variation, diallel cross, *Nicotiana rustica*, **767**

KALTER, H., 975
teratogenic action of cortisone, mouse, **185**
kappa-like particles in *Paramecium aurelia* sensitives, **229**
KEMPTHORNE, O., model for quantitative inheritance, **883**
KENWORTHY, W., 975
KIMBALL, E., 976
KIMBALL, R. F., 977
KIMURA, MOTOO, quasi-fixation in natural populations, **280**
KING, R. C., 977
KOJAN, SELMA, 995
KRAMER, H. H., linkage groups, barley, **159**
translocations, chromosome 10, maize, **506**

LEDERBERG, ESTHER M., 978
LEDERBERG, J., 978
LEFEVRE, G., JR., 978
LEIDY, G., 1002
LEVINE, ELIZABETH EPLING, genotypic control crossing over, *Drosophila pseudoobscura*, **677**
LEVINE, ROBERT PAUL, genotypic control crossing over, *Drosophila pseudoobscura*, **677**
LEVINTHAL, CYRUS, recombination in phage T2: relationship to heterozygosis and growth, **169**
LEVITAN, M., 979
LEWIS, H. W., 979
life span, radiation effect on, 969
Lilium, 960
LINDEGREN, C. C., 980
linkage, barley, **159**
linkage in chickens, 976
linkage, estimation of, by minimum discrepancy method, **581**
Lobelia, 959
LOTFY, THORAYA A., 994
lozenge locus, Drosophila, 963, 967
lysogenicity, 978
Escherichia coli K12, **429**, **440**

maize, 966, 990, 993
gamma radiation, endosperm mutations, **587**
heterotic effects, mutants, inbred lines of, **908**
translocations, chromosome, 10, **506**
variegated pericarp in, **724**
X-ray and gamma-ray induced mutations in, **750**
man, chromosome numbers, somatic tissue, **210**
MARKERT, C. L., 980
immunogenetics, tyrosinase, **818**
MARTIN, A., JR., 981
maternal effect, rat, **261**
MAUZY, W. L., 962
MCGREGOR, J. F., dose-response relationships, saturation effects, irradiated Streptomyces, **619**
MCKEE, D. W., polyploid yeast, **343**
MCQUATE, JOHN T., chromosome loss, Drosophila sperm, ultraviolet, **565**
MCQUISTAN, MARILYN, tomato, *beta*-carotene, **810**
melanogenesis, 980
Melilotus, interspecific hybrids in, **266**
Melittobia, 960
MENZEL, MARGARET Y., three-species Gossypium hybrids, **546**
MEYER, HELEN U., 982
MEYER, J. R., 982
MICKEY, G. H., 983

microphthalmia and maternal effect, rat, **261**
MILLER, D. D., 983
MILLER, W. J., 983
miniature complex, *D. melanogaster*, **45**
minutes, radiation produced, 983
MORGAN, W. C., 984
MORSE, M. L., 984
mouse, 963, 967, 969, 975, 984, 990
  chromosome numbers, somatic tissue in, **210**
  teratogenic action of cortisone in, **185**
MUKAI, F., 957
MULLER, H. J., 955, 985, 999
  chromosome arrangement, Drosophila spermatozoa, **836**
  X-ray dose and lethal mutations, Drosophila, **741**
MURTY, V. N., linkage by the method of minimum discrepancy, **581**
mutagenic action, carcinogenic compounds, *Escherichia coli*, **141**
mutation, dominant lethal, 957
mutation rates, autosomal, *Drosophila melanogaster*, **409**
  recessive lethal, 970, 977
  spontaneous, *Drosophila pseudoobscura*, *D. persimilis*, **899**

nectarine sports, peach, 964
neoplasms, 973, 979
Neralsia, 1001
Neurospora, 957, 955, 968, 972, 987, 988, 997
  crassa pseudo-wild types, **326**
  plating method in, **604**
neutrons, fast, 985
  thermal, 977
    effects on barley seeds, **240**
NEWCOMBE, H. B., dose-response relationships, saturation effects, irradiated Streptomyces, **619**
NEWMEYER, DOROTHY, plating method in Neurospora, **604**
Nicotiana, 991
  rustica, diallel cross, continuous variation in, **767**
NILAN, R. A., carbon dioxide, oxygen, and temperature effects, X-rays, barley, **943**
nitrogen mustard, effects, Habrobracon sperm, **317**
NOVITSKI, EDWARD, compound X chromosomes, Drosophila, **127**
  crossing over within an inversion, *D. melanogaster*, **197**
nucleic acid, metabolism, 998
  requirement, 971

OSTER, I. I., X-ray dose and lethal mutations, Drosophila, **741**
overdominance, 961
OWEN, RAY D., immunogenetics, tyrosinase, **818**
oxygen effect, 958, 975
  X-radiation, Habrobracon eggs, **851**
  X-radiation, barley, **943**

PALM, JOY, 985
Paramecium aurelia, 977
  kappa-like particles in sensitives of, **229**
PARKER, D. R., 986
parthenogenesis, Drosophila, **4**
PAULEY, S. S., 986, 987
Peromyscus, 973
PETTUS, D., 959
phage, T2, recombination, heterozygosis and growth, **169**
phase variation, 978
PITTENGER, T. H., 957, 987
  pseudo-wild types, *Neurospora crassa*, **326**
PLOUGH, HAROLD H., Conklin, **1**
polyploid yeast, genetics of, **343**
polyploidy, 974
  Solanum species, **59**
polysomic segregation, 957
POMPER, S., polyploid yeast, **343**
POND, V., 995
population structure, 959
Populus trichocarpa, 986
position effect, 979, 993
  Drosophila melanogaster, **513**
PROUT, TIMOTHY, genetic drift, irradiated populations, *Drosophila melanogaster*, **529**
pseudoalleles, 963, 967

QUACKENBUSH, F. W., tomato, *beta*-carotene, **810**
quantitative inheritance, model for, **883**
quasi-fixation, natural populations, **280**

rabbit, heterosis in, **667**
radiation effects, chemical protection against, **356**
radiosensitivity, Lilium, 960
RAGLAND, J. B., 988
Rana, pigment pattern, 999
rat, microphthalmia and maternal effect in, **261**
RATTY, F. J., 988
  gene action and position effect in duplications, *Drosophila melanogaster*, **513**
RAUT, CAROLINE, 989
RAY, D. T., 989
RENDEL, JAN, epistasis and antigenic substances, sheep, **396**
RICK, CHARLES M., primary trisomics, tomato, **640**
ROBINSON, H. F., 990
RUBIN, B. A., streptomycin resistance, *Escherichia coli*, **296**
RUNNER, M. N., 990
RUSSELL, LIANE B., 991

SAEZ, F. A., 1003
Salmonella, 978
SAND, S. A., 991
SANDLER, L., meiotic loss, chromosomes, *Drosophila melanogaster*, **365**
  reversed acrocentric compound X chromosomes, *Drosophila melanogaster*, **923**
SCHALET, A., 970, 992
SCHERR, GEORGE H., mutagenicity of carcinogenic compounds, *Escherichia coli*, **141**

SCHULER, JOSEF F., heterotic effect, mutants, inbred lines, maize, **908**
SCHWARTZ, DREW, crossing over mechanism, **692**
selection, 996
selection intensities, natural populations, **280**
natural, Cepaea, **89**
self-compatibility and competition, autotetraploid *Trifolium repens*, **307**
sex expression, 974
sex ratio factor, 958
SHAPARD, P. B., 992
sheep, epistasis and antigenic substances, **396**
SHEPPARD, P. M., natural selection, Cepaea, **89**
SHULT, E. E., 980
SINGLETON, W. R., 993
gamma radiation, maize endosperm mutations, **587**
Sitanion spp., hybrids with *Elymus glaucus*, **378**
SLATIS, H. M., 993
miniature complex in *D. melanogaster*, **45**
SMITH, H. H., 991, 994
SMITH, WILLIAM K., Melilotus interspecific hybrids, **266**
sodium barbital, cytological effect, 965
SOKAL, R. R., 994
Solanum, polyploidy in, **59**
somatic crossing over, 974
somatic instability, 991
SOOST, R. K., 995
SORENSEN, A. NEIMANN, epistasis and antigenic substances, sheep, **396**
Sorghum, 969
SPARROW, A. H., 960, 991, 995
SPASSKY, BORIS, concealed variability, *Drosophila prosaltans*, **472**
spontaneous mutation rates, *Drosophila pseudoobscura, D. persimilis*, **899**
SPASSKY, N., spontaneous mutation rates, *Drosophila pseudoobscura, D. persimilis*, **899**
SPEAR, R. JENELLE, 991
spinach, 974, 975
SPOFFORD, JANICE B., 996
STADLER, JANICE, 969
STALKER, HARRISON D., parthenogenesis in Drosophila, **4**
STEBBINS, G. L., hybrids between *Elymus glaucus* and *Sitanion* spp., **378**
STEFFENSEN, D., 996
chromosome aberrations, X-rays, Tradescantia, **220**
STEPHENS, G. J., 989
STEPHENS, S. G., interspecific homologies, Gossypium, **701, 712**
STEVENSON, E. C., 974, 975
STONE, W. S., 956
measurement and control, X-radiation effects, *Drosophila virilis*, **453**
STRAUSS, B. S., 997
Streptomyces, dose-response relationships, saturation effects in irradiated, **619**
streptomycin resistance, *Escherichia coli*, **296**
SWAMINATHAN, M. S., polyploidy, Solanum species, **59**

TASCHDJIAN, E., 997
TAYLOR, J. H., 998
TELFER, J. D., 955, 998
temperature, relation to X-ray effects, barley, **943**
tetrasomic inheritance, panmixia with, **150**
tissue culture, microsporogenesis in, 996
tomato, 963, 995
beta-carotene, genetics of, **810**
heterosis in, **488**
primary trisomics in, **640**
TOMES, M. L., tomato, *beta*-carotene, **810**
Tradescantia paludosa, 958, 996, 1001
Tradescantia, X-rays, fractional doses, **220**
transduction, 984, 1002
transforming principle, 1002
translocations, 955, 956
translocations, maize, **506**
Trifolium repens, competition and self-compatibility, autotetraploids of, **307**
Trillium erectum, 995
triploid Aster hybrids, chromosome behavior in, **117**
trisomics, primary, in tomato, **640**
tyrosinase, 972
specificity of, **818**

ultraviolet, 982, 989
chromosome loss caused by, Drosophila spermatozoa, **565**
dose-response relationships, **619**
saturation effects, Streptomyces, **619**

VAARAMA, ANTERO, hybrids, *Elymus glaucus* and *Sitanion* spp., **378**
variability, concealed, Drosophila, **472**
variation, continuous, diallel cross, **767**
VERDEROSA, F., 999
VEYL, ROSEMARIE, linkage groups, barley, **159**
Vicia faba, 994, 1001
chemical protection against radiation damage in, **356**
VOLPE, E. P., 999
VON BORSTEL, R. C., 1001
nitrogen mustard effects, Habrobracon sperm, **317**

WAGNER, R. P., 1000
WALKER, B. E., 1000
chromosome numbers, somatic tissues, mouse and man, **210**
WEAVER, R. H., mutagenicity of carcinogenic compounds, *Escherichia coli*, **141**
WHALLON, JEANNE, 962
WHITING, ANNA R., nitrogen mustard effects, Habrobracon sperm, **317**
oxygen effects, X-radiation, Habrobracon eggs, **851**
WHITING, P. W., 1001
WILLERMET, DAVID A., miniature complex, *D. melanogaster*, **45**
WILLOUGHBY, RUTH S., 973

WOLFF, S., 1001
  chemical protection, radiation damage, *Vicia faba*, **356**
WOOD, EUNICE M., 977
WOODARD, J. W., 965
WOODS, P. S., 965
WOODWARD, V. W., 1001
WOTTON, R. M., 981

X chromosomes, compound, Drosophila, **127**
  reversed acrocentric compound, Drosophila, **923**
X-radiation, direct and indirect effects, *Drosophila virilis*, **453**
  dominant lethals induced by, *Drosophila robusta*, **558**
  dose and lethal mutations, Drosophila, **741**
  dose-response relationships, saturation effects, Streptomyces, **619**
  effects, barley seeds, **240**
  effects, fractional doses of, **220**
  effects, maize, **750**
  effects, oxygen, Habrobracon eggs, **851**
  effects, relation of carbon dioxide, oxygen, and temperature to, barley, **943**

YANDERS, A. F., 983, 1002
  X-ray-induced dominant lethals, *Drosophila robusta*, **558**
YAO, T. S., heterosis, rabbit weight, **667**
yeast, cytochrome deficient, 989
yeast, polyploid, genetics of, **343**

ZAMENHOF, S., 1002
